

1st Quarter 2016 PBE Topic:

AU Responsibilities During Emergency Response

It is most important to note: All individuals in the laboratory working with or around the RAM must be trained, including what to do in the event of an emergency. **This is the Authorized User's responsibility.** *Ancillary Worker training* is required for all workers who work around, but not directly with RAM (this includes those who have access to the RAM restricted areas). *Radiation Worker training* is required for all workers handling and working with RAM.

1. Be available to your staff in the event of an emergency. Provide your contact information on the yellow RAM Emergency Procedures document.
2. Communicate the hazards to emergency responders prior to their entry.
3. If emergency responders require access to a RAM restricted space, survey the emergency responders before they exit the space.
